

Instrumentation & Control / Pressure Sensors

## PRESSURE SENSOR SERIES 2

### USAGE

Pressure Sensor for monitoring low, process-relevant pressures, e.g. as there are in valves during a spraying application. In connection with the WALTHER-LOGIC Limit Value Module, these processes can be indicated in reference to deviations from the settings, monitoring changes and will show any quitting of the process window.

### CONSTRUCTION

- 1 Pressure sensor
- 2 Electric connecting plug M12

### HIGHLIGHTS

- Delivery with connecting cable
- tight overall error band

### YOUR BENEFITS

- Increase of process capability by combining the pressure sensor with the WALTHER-LOGIC Limit Value Module
